

Cube Template

You will be creating a cube based on what you have learned about agriculture and the history of Saskatchewan!

Each face of the 6-sided cube represents:

1. Who
2. What
3. Where
4. When
5. Why
6. How

Using words, pictures, and sentences show what you have learned by filling in each of the squares of the box. Don't forget to be creative! When you are done filling in the squares, it's time to assemble the cube.

Directions to Assemble Cube

1. Cut along the solid lines only.
2. Fold inwards along the dotted lines.
3. Apply glue to the gray tabs to hold the cube together once you have folded.

8.5" x 11"
